ChatGPT overview

- **L**arge **L**anguage **M**odel (LLM)
- Large:
 - Trained on the internet
 - Billions (trillions) of parameters
- Language model:
 - A "transformer"

ChatGPT overview

- Fill in the missing word: "**I drove my _ to the supermarket.**"
- How do we know this?
- Patterns!

ChatGPT overview

- Researchers have been trying to emulate the brain's ability for years

ChatGPT overview

- Approach is fundamentally to **predict the next word**

ChatGPT overview

- Artificial intelligence (AI) has improved enormously over the last 20 years
- But even in 2017, "chatbots" would fail the "Turing Test"

ChatGPT overview

- Innovations in 2017 allowed dramatic improvements in **Generative Pre-trained Transformers (GPT)**
 - (Actually, dramatic improvements in all types of transformers)
- Interacting with ChatGPT can feel truly human
 - Passes the Turing Test
- But under the hood, it is still simply predicting the next word
 - Importantly, it is doing so **probabilistically**
